

RECIPE FOR Seeds bombs

BY Salve Saracura & Bixiga community garden

Description

Realizing the socio-environmental degradation on the meadow bordering the Saracura River caused by human action, the collective decided to include the ancestral technique of muruca (seeds bombs) in an educational activity.

Ingredients

- three types of seeds
- clay
- black soil
- slingshots

Preparation

- Gather seeds from the mother tree.
- Respect its timing: blooming, seed bursting.
- Use clay for the preparation of the capsules in the shape of small croquettes.
- Fill the capsules with substrate (virgin forest soil), the seed's cradle.
- Close the capsules to protect the seed. The ecological bombs are ready.
- Once ready, they are launched into the earth with slingshots.
