

RECIPE FOR **A CIRCULAR CASE** ^{✓ WATER}
BY *labtek apung & friends*

Description

Making a case of water is not an easy one, mainly when it comes to providing scientific proof which usually conducted by the experts. This recipe introduces scientific inquiry as an accessible idea, how to work with experts, and include broader public to conduct a case of water.

Suitable for adult with curiosity and patience.

Ingredients

- vehicles
- sampling materials
- communication devices
- lab access by experts

Preparation

remind the public that the lab is accessible
should there be an extraordinary event
or if they want to test from time to time

invite public to accompany experts
to take sample

identify sampling points/
objects* (e.g. river, lake, well, etc.))

bring back the test result
to the public and discuss

test the sample
in lab

- prepare sampling materials,
(bottles, jerrycan, marker/labels)
best if it is locally resourced

invite public to 'engage' with the water source

any complaint?

any unusual color, odor, texture?
